Redefined

Product / Company: Food Delivery App
Target Cohort: College Students
Primary Goal: Increase repeat orders
Generated: Oct 13, 2026

1. Executive Summary

High-level distillation of core diagnosis and strategic vector

Executive Summary & Core Strategic Insight

Problem Summary: Summary
Recommended Direction: Direction
Core Insight: Insight

2. Problem Definition

Redefined problem, affected cohorts, and business criticality

Redefined Problem: Redefined

Business Impact & Urgency: High

Why It Matters: Matters

Affected Stakeholders & Cohorts:

- Users

3. Problem Breakdown

Decomposition into functional, behavioral, and market dimensions

1. Dim 1

Desc

- Sub 1

4. Root Cause Analysis

Separation of user facts, possible mechanisms, and unvalidated hypotheses

1. User-Provided Facts (Ground Truth) Supplied by User

- Fact 1

2. Possible Root Causes Unconfirmed Mechanisms

Cause 1 Cat Assumption

Possible Mechanism: Mech

3. Hypotheses Requiring Validation Must Be Tested

- **H1:** Hypo 1

PM Rigor Reminder

Note

5. Testable Hypotheses

Falsifiable assertions with explicit evidence requirements

H1: H1 Confidence: High

Why It Could Be True: Why
Evidence Needed to Validate: Evidence
Confidence Rationale: Rationale

6. Investigation Questions

Targeted qualitative and quantitative discovery inquiries

Q1 Cat

Investigation Rationale: Why

7. Data & Signals Needed

Telemetry, qualitative metrics, and instrumentation requirements

Metric 1 Priority: P0 Cat

What to Look For: Look

8. Potential Solutions

Candidate intervention vectors evaluated across impact, effort, and assumptions

Sol 1 Impact: High Effort: Low

Description: Desc
Problem Addressed: Prob
Impact Rationale: Rationale
Effort Rationale: Rationale
Key Assumption: Assumption

9. Proposed Experiments

Testing protocols with explicit metrics and Go/No-Go decision rules

Exp 1 Impact: High Effort: Low

Hypothesis Tested: H1
Target Users: Users
Design: Design
Duration: 2w
Primary Metric: Metric
Expected Result: Result
Decision Rule (Go / No-Go): Rule

10. Experiment Prioritization

Text-based prioritization analysis and execution recommendations

1. Quick Wins (High Impact + Low Effort) High Leverage

Exp 1 Priority: High

Impact / Effort / Priority: High / Low / High
Reason: Reason
Category Justification: Why

2. Strategic Bets (High Impact + High Effort) Strategic Investment

No proposed experiments meet both criteria of High Impact and High Effort.

3. Fill-ins (Low Impact + Low Effort) Opportunistic

No proposed experiments meet both criteria of Low Impact and Low Effort.

4. Deprioritize (Low Impact + High Effort) Do Not Prioritize

No proposed experiments meet both criteria of Low Impact and High Effort.

5. Moderate Priority (Medium Impact or Medium Effort) Moderate Tier

No proposed experiments have Medium impact or Medium effort.

RECOMMENDED FIRST EXPERIMENT

Experiment Name: Exp 1
Expected Impact: High
Required Effort: Low
Why It Should Be Run First: Why
What We Need to Learn From It: Learn

11. Success Metrics & Guardrails

Primary North Star, secondary indicators, and guardrails

Primary Success Metric (North Star)

Metric Name: Primary
Baseline: Baseline: Not provided
Target: Suggested target
Definition: Def
Why Chosen: Why
Measurement Method: Method

Secondary Metrics (Supporting Indicators):

Sec Baseline: Not provided
Definition: Def
Relevance: Rel

Guardrail Metrics (Do Not Harm):

Guard Threshold: Warn
Definition: Def
Why Crucial: Crucial

12. Risks & Assumptions

Risk mitigations, assumptions, dependencies, and unknowns

Key Risks & Mitigations:

Risk 1 Severity: High
Mitigation Plan: Mit

Critical Assumptions:

- **[Unvalidated]** Assump 1

Project Dependencies:

- Dep 1

Key Unknowns to Investigate:

- Unk 1

13. Recommended Action Plan

Sequential execution roadmap across owners and milestones

Step 1: Diagnostic Cohort Analysis Timeframe: Week 1 Owner: Product Analytics
Key Action: Run retention drop-off queries

Step 2: Launch MVP Experiment Timeframe: Weeks 2-3 Owner: Growth Eng
Key Action: Deploy lightweight test
